- **The purpose of the works is to mitigate surface water flooding reported at these locations. This will be carried out by:**
  1. **Installing new plastic trapped gullies and larger grated catch-pits to replace the existing smaller road gullies and provide additional surface water capture upstream of the low point situated at the junction of Chipperfield Road and Green Lane.**
  2. **Further remedial works along the drainage system to bring it back to a maintainable standard and build in future resilience to the system.**
- We request that residents **do not park** vehicles on the carriageway within the working areas during the times shown and refrain from parking over any gullies or manholes. This will allow the Contractor easy access to the road surface so the works can be undertaken as quickly as possible.
- *Any changes to the above dates will be indicated on the signboards at either end of your street, and at [www.hertfordshire.gov.uk/roadworks](http://www.hertfordshire.gov.uk/roadworks)*
- *A map of the **Work Extents and Traffic Management Phasing Plan** is overleaf.*
